

MyFax for the Mobile Professional

Fax and print documents from anywhere using your BlackBerry™, Palm® Treo™ or other handheld device.

MyFax™ is an Internet-based fax service that enables you to send and receive faxes using existing email accounts and the web. Faxes sent to your MyFax number are instantly forwarded to your email address as PDF or TIFF attachments. You can also send faxes via the web and access your last 31 days worth of inbound faxes using an online interface.

MyFax is ideally suited to the mobile professional who spends a large majority of their time away from the traditional office setting. Mobile professionals currently using a BlackBerry, Palm, Treo or other handheld device can extend this important investment with MyFax. Existing handheld functionality such as text messaging, voice, email, and web access can be complemented with MyFax to maximize business productivity.

- **MyFax turns your existing email network into an inbound private fax mailbox so faxes remain completely confidential.**
- **“Print from Anywhere” functionality. Using MyFax on your handheld, you can send documents to any fax machine to be printed instantly!**

Never miss those essential incoming faxes left behind at the office fax machine again.

Sending and Receiving Faxes with MyFax using your handheld device.

Benefits for the IT Professional

- **Rapid, low-cost rollout** – leverage existing user environment – no additional hardware or software is required (no fax lines, fax boards or fax servers).
- **Streamlined Document Processing** – eliminate document scanning and paper archives by receiving faxes electronically.
- **On-Demand Capacity** – capacity when you need it.
- **Reliable and Secure** – fully redundant with advanced security measures – SSL, PGP encryption and VPN connectivity.
- **Easy to Integrate** – extend your solution by integrating fax with existing business systems such as CRM and ERP deployments – MyFax offers two types of interfaces for integration: SMTP and XML. Programmers can integrate applications directly to MyFax, relying on Protus for delivery.
 - **SMTP:** By constructing an SMTP MIME formatted email, a document can be automatically sent to Protus for delivery (ideal for web-based applications).
 - **XML:** Where total security and real-time reporting are a necessity, documents can be delivered via API over industry standard Web Services.

Quality. Reliability. Service.

- 99.5 per cent service availability.
- 24/7 support.
- Real-time, online reporting of exactly the data you need.
- Full-service assistance available from our Customer Support Team.
- The capacity you need, when you need it.
- No hardware or software investment required.
